## TRIBUTE TO COLDPLAY

---

## Technical Rider

### **Wouter (vocals, acoustic guitar, electric guitar)**

- SM58 into TC VoiceLive (M1)
- Line6 Variax Acoustic, 1x XLR, directly connected to the soundboard (from pedalboard front of stage, no DI box required)
- In-ear monitor via XLR/Jack

### **Roel (electric guitar, vocals)**

- Kemper Amp, Stereo signal, 2x XLR directly connected to the soundboard (no DI box required) (A1)
- Microphone vocals (M3)
- Wireless In-ear monitor system needs XLR monitor signal cable at position A1

### **Jan-Willem (bass guitar)**

- Ashdown Labs 600 (A2)
- Tech 21 VT Bass DI, 1x DI XLR balanced mono signal, directly connected to the soundboard (no DI box required), from pedalboard (front stage)

### **Martijn (drums, vocals, sequencer)**

- Yamaha Oak CustomX
  - 1 x 22"x20 kick (Shure Beta 52a mounted internal with Kellyshu)
  - 1 x 14" snare
  - 1 x hi hat
  - 1 x 12" tom
  - 1 x 16" tom
  - 1 x overhead
- Alesis IO Dock (D1), 2 x DI jack unbalanced stereo signal. This is also the tone generator for both midi keyboards (**2 DI boxes required**)
- Line OUT XLR clicktrack to use for monitors guitar, lead vocals and bass (**1 DI box required**)
- Microphone vocals (M2)

**Note:** A drumfill monitor is not required. Only XLR monitor signal cable to feed an In-Ear monitor system provided by the drummer.

## Comments

### *Sound*

- We prefer an overall ambient sound with effects
- The sequencer is of prominent importance in the mix
- Leave the volume of all vocal microphones up during the show

### *Equipment*

- The drumset will not be shared with other bands. Other equipment may be shared, but needs to be discussed well before the show
